

### Closed Circuit Television CCTV

Where ever you go CCTV cameras are present in our every day life helping cut crime and provide not only security but also peace of mind. All too often camera equipment and recording devices are installed but it's not until an incident occurs and the recorded images are inadmissible as evidence, for example due to poor quality, slow capture rate and non-compliance of the data protection act, that users realise the system is not fit for purpose.

**CDI Services** are not tied to a particular manufacture. That means we can use our expertise and experience to design and install the **correct system** to meet your requirements. From a single camera through to remote monitored multi site installations, whilst keeping you compliant with all regulations.

Since the 24th October 2001 it has been a criminal offence to use an unregistered CCTV system to record people in a public or private place, unless it meets certain criteria. The introduction of the Data Protection Act 1998 and other related legislation has had far reaching consequences for those who own, manage or operate CCTV systems in the United Kingdom. Every aspect of this new legislation impacts upon your use of CCTV.

The Code of Practice contains 62 legally enforceable 'Standards' that must be met to ensure compliance with the Data Protection Act 1998. The Commissioner includes a further 30 points of good practice, which together with the standards are designed to build and maintain public confidence in CCTV systems and to ensure that they operate within the law. The Data Protection Act 1998 came into force on March 1st 2000 and the Information Commissioner has issued a Code of Practice for CCTV systems. This Code was updated on July 14th 2000 and is available at [www.dataprotection.gov.uk](http://www.dataprotection.gov.uk).

All **CDI Services** CCTV systems are designed to meet all the above & EN50132-7 Standards

8 Oak Road, Epping, Essex. CM16 5 DJ

Providing bespoke solutions for the **C**ommercial, **D**omestic and **I**ndustrial market is our speciality.

In general camera selection is based on the following factors;

1. Aesthetics',
2. Location and,
3. Use.

With the range of modern electronics and software CCTV systems and camera's are becoming increasing small and yet very powerful.

Standard Smoked Dome

High Vandal Resistant

Elegant Low Profile Mini Dome

CCTV system range options include Fixed, or Pan Tilt and Zoom (PTZ), Wired, Wireless or IP (Internet Protocol) network. Also the need to display images can range from via Quads, Multiplexers, Triplexers. Local Monitoring, Remote Monitoring ..... and the lists go on.

Recording choices these days are mainly DVR (Digital Video Recorder) based although in some area's tape VCR's are still widely used.

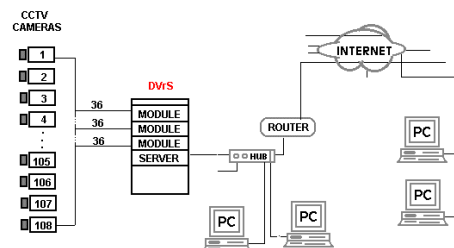

Low profile, Micro, Board & Covert camera's are becoming commonplace

Even in very low light conditions these camera's can produce amazing results

## Network Solutions

This brochure is intended as an overview to the types of systems available.

**CDI Services** provide bespoke systems tailor made to suit each site and operation requirement.
